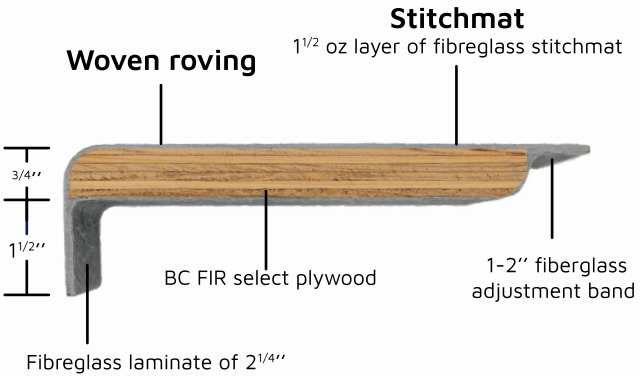
BALCONY & STAIR MODEL SPECS

Models 100/200/300 : *All of our balconies are made from BC FIR select plywood 18.5 mm (3/4'') thick. The balcony is entirely covered with fiberglass and polyester resin. The corners are molded from 2 1/4'' on the facade and on the sides, which promotes better water flow and protects the structure. A door threshold can be integrated if necessary.*
During installation, a fiberglass adjustment allows the balcony to be adapted to any shape without getting delaminated.

Model 100

Stitchmat



The upper side of the balcony is covered with a layer of **stitchmat** (fiberglass) 1 1/2 oz / ft² with a non-slip finish, as well as a layer of 4.5oz / sq. ft. woven (fiberglass) laminate with a non-slip finish.

The underside of the balcony is covered with a layer of **stitchmat** (fiberglass) 1 1/2 oz / ft².

A finishing gelcoat color is applied on the surface of the balcony.

Models 200/300

Stitchmat & granite finish

The upper side of the balcony is covered with a layer of **stitchmat** (fiberglass) 3 oz / ft² with a non-slip finish.

The underside of the balcony is covered with a layer of **stitchmat** (fiberglass) 1 1/2 oz / ft².

Models 200H/300H

Granite finish

A hybrid version of the 200 models with 8'' of composite to screw the railings without ever perforating the plywood.

Models 2000/3000

Model 2000 : Same specifications as the model 200, except that the interior is entirely made of composite.

Model 3000 : Same specifications as the 2000 model, except a granite finish (vinyl flake) with gelcoat is applied to the upper side of the balcony.

FIBROBALCON
DEPUIS 1963

BALCONY & STAIR MODEL SPECS

Models 400/500 : *All balconies are made from BC FIR select plywood 18.5 mm (3/4'') thick. The balcony is completely coated with fiberglass and polyester resin. A 2'' molded drip tray on the front and sides promotes better water flow, thus protecting the structure. A door threshold can be integrated if necessary. All balconies and steps have a gelcoat finish ISO-NPG 12-14 thousandths thick.*

Model 400

Stitchmat

The upper face of the balcony is covered with a layer of 3oz / sq. ft. **stitchmat** (fiberglass) with a non-slip finish.

The interior face of the balcony is covered with a layer of **stitchmat** fiberglass at 1 1/2 oz per sq. ft.^{2}

A color gelcoat finish is applied to the surface of the balcony.

Model 500

Stitchmat & granite finish

Same specifications as model 400, except a granite (vinyl flake) finish with gelcoat applied to the surface of the balcony.

Steps available in all models

2 layers of BC FIR select 3/4'' plywood.
